

WONG ZHAO YUEN

Singapore | zhaoyuenw@gmail.com | [linkedin.com/in/zhaoyuenwong](https://www.linkedin.com/in/zhaoyuenwong)

PROFILE

Computer Science and Design undergraduate at SUTD focused on human-centred AI, Android development, and education/eldercare technology. Experienced in building AI-powered mobile apps, SQLite-backed learning flows, FPGA-based hardware systems, and startup commercialization/pitching.

EDUCATION

Singapore University of Technology and Design (SUTD)

Present

Bachelor of Science, Computer Science and Design | Singapore

- Relevant coursework: Information Systems and Programming, Computation Structures, Operating Systems, Machine Learning, Database Systems, Human-Centred Design.

EXPERIENCE

AMI Neuroworks | Business Development Manager

Feb 2025 – Feb 2026

Seed-stage student-initiated startup in collaboration with SUTD Language and Social Cognition Lab

- Lead brand, content, exhibition/poster materials, and investor-ready pitch decks for AI-driven cognitive engagement tools supporting older adults.
- Support commercialization planning, client negotiations, stakeholder meetings, and marketing campaigns for pilots, showcases, and partnership development.
- Contribute to AMI platform codebase and usability preparation, including feedback loops for AI chatbot and cognitive game modules.
- Supported milestones including SUTD Baby Shark Fund 2025 incubation, SUTD GAP funding, NLB SG60 showcase involvement, and Top 8 at Aalto University Deep Dive Finland 2025.

The Logic Coders | Technology / Coding Educator

Present

- Teach programming and computational thinking through guided lessons, hands-on practice, debugging support, and adapted explanations for different student levels.

SELECTED PROJECTS

Strive - Android AI Study Companion App | Software Developer

May 2026 - Present

- Developed core Android screens and flows for study chat, contextual quizzes, history, rewards, shop, profile, coins, loot boxes, and avatar customization.
- Integrated OpenAI Chat Completions API with anti-spoonfeeding guardrails to encourage guided learning rather than direct answer-giving.
- Used SQLite to persist study sessions, quiz records, user progress, daily quiz opportunities, coin rewards, and avatar states; tested and debugged end-to-end mobile flows.

Tech: Android, Java, SQLite, OpenAI API, mobile UX, local-first data persistence

GridBug - Real-Time 2-Player Hardware Grid Game | Project Team Member

Feb 2026 - Apr 2026

50.002 Computation Structures, SUTD

- Implemented and tested shifting/movement functionality for a responsive multiplayer grid game on physical hardware.
- Designed FSM/datapath logic for movement control, collision handling, and rule enforcement; assembled FPGA, breadboard, and LED matrix setup.
- Resolved power, movement, and hardware integration issues through iterative debugging; integrated project into a wooden arcade casing and selected for SUTD Open House showcase.

Tech: FPGA, FSM, datapath design, digital logic, LED matrix, hardware debugging

StoryWeaver - Android Interactive Fiction Prototype | Team Member

Feb 2026 - Apr 2026

50.001 Information Systems and Programming, SUTD

- Built an Android mystery prototype combining procedural 2D map generation, AI-powered story generation, and replayable investigation gameplay.
- Supported Wave Function Collapse-based map generation assets, rules, and rendering for varied but logically consistent environments.
- Conducted playtesting and polishing; applied OOP, software architecture, data structures, and algorithm design in a complete working system selected for SUTD Open House.

Tech: Android, Java, procedural generation, Wave Function Collapse, OOP, data structures, AI story generation

LEADERSHIP & SKILLS

SUTD Ultimate Club | Secretary

Jan 2025 – Feb 2026

- Support club operations, administration, communications, logistics, and coordination for training and student organisation activities.

Programming & Development: Node.js, Java, Python, C, SQL, HTML/CSS/JavaScript, Android Studio, Git/GitHub, SQLite

AI & Data: OpenAI API integration, prompt design, AI-assisted learning flows, local data persistence, usability feedback analysis

Product & Business: Figma, human-centred design, mobile UX, field research, usability testing, pitch decks, stakeholder management, commercialization planning
